### Transcript:

(Pre-registered for the Matteson Meeting on July 25<sup>th</sup>.) I can give you a preliminary on what it's going to be about uh, just uh, a uh small comments about the vibration from the trains and the noise pollution, I don't know how they can get away with the vibration and noise pollution. I have a brand new uh home and the noise vibration rattles all my windows, that's just one comment and I'm sure if it hooks up with Canadian National who knows what they're going to haul uh as far as hazardous waste material and what their plan is if ever it should be dumped in our backyards where we live in Frankfort, Illinois. I'd like to make my comments be August 25<sup>th</sup> meeting. Thank you.
