Docket No FD 35952

According to The New York Times 10-4-2002.
The US is losing 2 acres of farmland every
minute to development. This is 120 acres per hour
2880 acres per 24 hours
20,160 acres per week.

Do I need to continue, and this is 2002
projections.

Rock prairie is some of the best, gentle
farmland in the world. When this very
valuable land is paved over it is gone
for ever!!! Please save the land that

sustains us, it can not be recreated.
The challenge is to recognize the prairie
as a precious and irreplaceable natural
resource.
