① Noise Pollution / Sound Wall

This is from my front porch facing South. The proposed railroad will run across the field only a few hundred feet from my property. I love the peace, quiet and serenity, but that will be destroyed!

The leaving of the train whistle, the chugging of wheels on the track will be as noisy as almost any and cause the house to vibrate.

My husband has Parkinson's Disease and am his caregiver. It will be medically harmful to be exposed to the constant noise.

2 Noise Pollution/Land Use

This is the parcel of land south of me
by which the railroad will be constructed.
The tracks will separate the parcel for
farming. As of now the farmer (an elderly
widow) from the road, with the train (as
the road he will have to enter another way)
through my land or the another, close to his
field. The farmer will be put at a disadvantage
to take care of the land!

③ Price Collection/Save Me

This is the land across County Line Road
owned by the former Grace & wife and she does my
land as well.

According to the railroad parts the train will
run through his entire field from twenty five
to thirty 2! The white rock in the picture is
him (burn) that stone (hay). It may look close
but it makes every 1 (at the present he can)
cultivate his land and raise very easily of the
train comes he will be divided all the way
his land. In order to do my twenty acres, he
could have to cross the tracks! He has all ready
