Mr. Morris -

We have a couple of map options available to you on our project website. The Maps page contains a general project location map, which may not suit your needs. The Maps page also contains a KMZ file of the proposed rail line viewable through Google Earth. Once in Google Earth, you'll be able to zoom in and look at the proposed rail line in great detail. I hope that works for you.

Here is a link the Maps page of our project website:

<http://www.greatlakesbasinraileis.com/maps.html>

Please let me know if you have any additional questions.

Thanks,

Dave

Subject: STB Docket No. FD 35952

Mr. Navecky,

I have begun reviewing the preliminary materials on your EIS for the new rail line. I have downloaded the indicated material from the provided website but can not locate a corresponding map. It is difficult to fully assess potential impacts to park resources without knowing the proposed rout of the new rail service. Can you please provide me with a map that illustrates the proposed rout?
