How will CN's proposed acquisition of the EJ&E impact you?

We live in the housing community of Indian Creek Club within the village of Long Grove. The community HOA is officially against this acquisition and I want to express my personal concerns with the CN acquisition. The increased train traffic would have significant effects on noise pollution, congestion, and safety. I also have concerns about housing values within the community which would impact Long Grove property taxes. As a result and in summary I am against this acquisition.
