MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Jed Reynolds

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. David Ereth

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Dave Fairburn
Military Road So.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

The STB should take the "no action alternative" regarding the Tongue River. The only purpose of this railroad is to haul coal from Otter Creek to export markets. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruin. The entire project is a speculation, and there is no reason to ruin communities, ranches and the Northern Cheyenne tribal lands for such a project.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Mariah Maracle
11500 15th Ave NE

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Karen Howard

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Lee Buffington

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Mark Resnick

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please remember that you represent the interests of all Americans, not just a tiny, but powerful, ultra-wealthy minority with no interest at all in the negative consequences of their actions on society at large.

Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Keith Stracchino

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Claire Trauth

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Don Bianchi

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Seriously!

Sincerely,

Ms. Tara Leigh

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Please consider the best situation for your many constituents in Montana, Idaho and Washington and seek out sustainable, clean energy sources rather than continue to pollute and destroy the environment through strip mining. Let's look to the future together rather than doom us all with pollution, climate warming and destruction of our planet. We can do better.

Sincerely,

Ms. Lisa Drost Nash

Fossil Fuels are destroying our Earth and we don't need to spend anymore money on the devastating effect. Coal is DIRTY and those companies need to invest in clean energy which is cheaper and provides more jobs. They need to invest in Bio-Mass products instead of harmful 19th Century technologies.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. S. Wolf Britain

Carrying coal to China seems to be a wrong idea economically, environmentally, and potentially unprofitable to transport. By the way, anybody know if the sodium laden coal to be extracted is 'clean' coal or 'dirty' for use as fuel by anyone, Chinese included? As an alternative, how about supporting the notion of an efficient low emission coal fired steam powered power generation plant on the site and bury the overburden and coal ash in the hole whence came the coal in the first place??? Power can be added to the National Power Grid shipped cleaner and cheaper than shipping raw coal thousands of miles over land and sea, doesn't it? And with less infrastructure and environmental destruction than a railroad. How about creation of jobs beyond stripping the coal out of the ground to ship rather than use it in place and bury the leftovers in covered grassland?

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Clinton Betz

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Elaine Kimbler

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Debbi Pratt

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Martha Armitstead

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

Enough is Enough!!! We already have enough trains going through many town in Montana. We don't need anymore!! We don't want the ones we have!

Sincerely,

Mrs. Katharine Duncan

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

As a resident of Washington, through which the coal trains would travel, I strongly oppose building this railroad to transport coal to export markets when the world should be getting away from coal and other fossil fuels altogether.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Helen Curtis

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I live in Montana. I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. China's Department of Environmental Quality announced that the city of Beijing will be coal free by 2020. The Rockefeller Foundation, built with Standard Oil money, says that it is divesting of all fossil fuel stocks and bonds.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Laureen Manera

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Khris Burdick

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Mark Koehnen

This is a disaster waiting to happen. I personally know ranchers who have had family ranches on this proposed route for over a century. This would be the demise of their way of life!!! We, as responsible human beings, cannot let this happen.

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Nancy Fredrick

Dear MT Surface Transportation Board Blodgett,

Dear Mr. Blodgett:

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

In WA State we already face the prospect of 100's more oil trains to export our oil. We don't want coal trains crossing our state in order to line the pockets of executives at Arch and the Tongue River Railroad companies.

Please take the "no action alternative" on this proposal.

Alicelia Warren
University Place WA 98466-4824

Sincerely,

Ms. Alicelia Warren

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

Dear MT Surface Transportation Board Blodgett,

Please pay attention to what really matters here. That is: keep the coal in the ground, and don't support the plans of this failing coal mine operation. Because it will drive another nail into the coffin of clean air, rational decisions regarding climate change and the health of those exposed to coal shipped by rail, I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Mike Kuntz

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Enter an optional additional message here.

Sincerely,

Ms. Laura Zerr

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Enter an optional additional message here.

Sincerely,

Mr. Dale Middleton

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Marta Janer

I am a grandmother and resident of this beautiful and rich land here on the Northern Cheyenne Indian Reservation where my husband was raised and where we have raised our four children. This area needs to remain pure and unadulterated for the generations to come. Mining this Otter Creek coal and building a railroad to transport it is NOT in the best interest of the residents or of the Earth.

I have been a teacher for the past 37 years here on the Northern Cheyenne and want to know that these individuals that I've taught and their families will have a secure future with clean air, water and land, unadulterated by a coal mine and all that comes with it.

Sincerely,

Dear MT Surface Transportation Board Blodgett,

It's unconscionable to destroy southeastern Montana for any reason, but certainly not to implement 19th century energy policy. We're well past the point of new coal development: natural gas & renewables offer cheaper, cleaner alternatives that better serve Montana, and the country, in the long term.

Time to move on. No to the railroad. Please.

Sincerely,

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Sandra Phoenix

Dear MT Surface Transportation Board Blodgett,

It would be morally wrong to build this railroad for several reasons. Please do not give any permission to build it. I'm not sure why this plan wasn't already scrapped by competent authority. Other than for a few people to get rich, there is no moral reason to build any Tongue River railroad, and I don't see why competent authority keeps putting mining companies ahead of everyone else's interests.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad would be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad. Thank you.

Sincerely,

Mr. Peter Caliandro

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Jean Mcallister

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. M S May
2072 S Parkwood Cir

May 29, 2015

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

As a former Montana resident and current Washington citizen, I adamantly oppose construction of the Tongue River Railroad and urge the STB to choose the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine. The last thing an overheated planet needs is yet another coal mine. We should incinerate the planet so Arch Coal can pad its bottom line?

The draft EIS wrongly assumes there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. You wouldn't want these miles-long filthy trains rumbling though your neighborhood; guess what, neither do we. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not remotely in the public's interest. Choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Paul Franzmann

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Joanne Watchie

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Beth Brunton

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Robert Connor

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

Carrying coal to China seems to be a wrong idea economically, environmentally, and potentially unprofitable to transport. By the way, anybody know if the sodium laden coal to be extracted is 'clean' coal or 'dirty' for use as fuel by anyone, Chinese included? As an alternative, how about supporting the notion of an efficient low emission coal fired steam powered power generation plant on the site and bury the overburden and coal ash in the hole whence came the coal in the first place??? Power can be added to the National Power Grid shipped cleaner and cheaper than shipping raw coal thousands of miles over land and sea, doesn't it? And with less infrastructure and environmental destruction than a railroad. How about creation of jobs beyond stripping the coal out of the ground to ship rather than use it in place and bury the leftovers in covered grassland?

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Cindy feist

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. Russ Alarcon

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Katherin Balles

I don't understand how we can continue to harm human who live on the land and all in the path of this mining enterprise. Then we all suffer from burning coal. This is distilled greed and harm. I lived in Wyoming and saw the damage from the usual extraction industries. No Tongue River Railroad, no more pillage.

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Enter an optional additional message here.

Sincerely,

Ms. Kerry Moore

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. John Queen
1305 20th St

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. James E. Miller

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

We here in Conway, WA, live next to the Burlington Northern track have witnessed the increased train traffic attendant on oil and coal shipments. That increase has directed out attention to the far-reaching effects of fossil fuel transport and export. While generating profit for the few, the benefits of such practices are far outweighed by the problem they bring, here and world-wide.

Please look ahead when you make a decision. If we continue on our present course, there is both a literal and figurative train wreck not far in our future.

Thank you for listening...

Sincerely,

Mr. Ken Winkes

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Chris Campbell

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Connie Gagnon

May 29, 2015

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

How often do you see tribes, ranchers, and environmentalists working together? It has to be a pretty seriously disastrous proposal to bring that kind of coalition together. And it is.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The work has already been done to quantify the amount of coal dust generated by each train hauling coal across Washington. The Best Available Science is there and must be considered. Allowing the Tongue River Railroad would adversely impact the health of large numbers of people living near rail lines. And of course there is the long term global impact of mining, transporting, and ultimately burning the coal. We already have a painful surfeit of information about climate change resulting from the burning of coal.

While the word is rare in the regulatory language, there is a time when "no" is the only appropriate response. This is one of those times. The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company - and even their benefits will be short term. Even they need clean air, clean water, and clean soil in which to grow food. All of those are put at

risk by this proposal. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Steve Erickson

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Millie Magner

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I'm against construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's only purpose is obviously haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Jack & Dorothy Macslarrow

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Stan Parker

Dear MT Surface Transportation Board Blodgett,

As a member of a broad coalition of activists in Washington State opposed to coal mining and coal transport, I stand with Montana ranchers, Northern Cheyenne tribal members, and Montana community members in opposing construction of the Tongue River Railroad, and I urge the STB to take the "no action alternative." The coal economy is dwindling, the railroad is not needed and will soon be obsolete, but the environmental damage (direct and indirect) that the railroad will cause will be significant and long lasting. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Jim Giles

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Garrison Dyer

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Mark Porter

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Malcolm Dole

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Cheryl Kindschy

The excuse of more jobs is only true if we consider the jobs to be created in health care and disaster relief.
The excuse of " if we don't do this someone else will" exposes the lack of character and good conscience of those who make those statements. Right thinking, socially and environmentally responsible citizens of this planet understand that the future of the planet and survival of the human species is dependent upon each decision to put them first in all our deliberations.

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Nancy Goodwin

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Enter an optional additional message here.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Margo Hunter

May 29, 2015

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

How often do you see tribes, ranchers, and environmentalists working together? It has to be a pretty seriously disastrous proposal to bring that kind of coalition together. And it is.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The work has already been done to quantify the amount of coal dust generated by each train hauling coal across Washington. The Best Available Science is there and must be considered. Allowing the Tongue River Railroad would adversely impact the health of large numbers of people living near rail lines. And of course there is the long term global impact of mining, transporting, and ultimately burning the coal. We already have a painful surfeit of information about climate change resulting from the burning of coal.

While the word is rare in the regulatory language, there is a time when "no" is the only appropriate response. This is one of those times. The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company - and even their benefits will be short term. Even they need clean air, clean water, and clean soil in which to grow food. All of those are put at

risk by this proposal. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Steve Erickson

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Enter an optional additional message here.

Sincerely,

Mr. mr.G. West

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Josh Kato

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Diane Mann

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Catherine Ross

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Jiazhu Zhang

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Rick Harlan

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Michael Winger
