MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Richard Sundmacker

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. Barb Cameron

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling and our planet is suffering from continued burning of fossil fuels. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine. I don't want coal or explosive gas trains barreling through Spokane over our aquifer, our downtown, and along our rivers.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

We oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets but it's time to get off the coal standard; burning coal leads to serious environmental damage.

Also the draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

This project is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Glenn Carnahan

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Barbara Rosenkotter

Having personally visited this area back in the 70ies, we should preserve the old ranching culture. This RR will bisect many ranches making them uneconomical. I did meet a rancher on the Powder River in that time frame. He had to sell his ranch in Colorado after it was bisected by a Highway as well as a military road. This is the part of the US that was his choice to ranch without external threats. Don

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Lloyd & Elizabeth Taylor

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Shari Sutherland

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. Larry Goehner

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Hanna Petros

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Crystal Gartner

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Ethel Mac Donald

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Andrew Brinkhaus

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Tara Luna

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Dear MT Surface Transportation Board Blodgett,

As conservationists and Montanans we oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative and environmentally destructive railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines, including through our community. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. There is no doubt that this is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Thank you for listening.

Sincerely,

Ms. Gail and John Richardson

MT Surface Transportation Board Ken Blodgett MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins.
Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Enter an optional additional message here.

Sincerely,

Ms. Test Test

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins.
Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Robin Everett

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I strongly support construction of the Tongue River Railroad and urge the STB to take immediate action to expedite construction." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling and need all the help they can get. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial dire straits, so need our help to bring this project to fruition. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river by environmentalist groups such as the Sierra Club.

The draft EIS correctly assumes that there is a domestic coal market for Otter Creek coal, and correctly assumes that there will be minimal train traffic impacts from construction of a rail line that could relieve 18-26 additional coal trains per day currently traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would receive greatly enhanced economic value.
The beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company in addition to the public at large. This is most definitely in the public interest. Please choose "immediate affirmative action" for the Tongue River Railroad.

Sincerely,

Mr. Steve Gunderson

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest not is it sustainable for the long term. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

The Tongue River Railroad should not be permitted. The project will destroy the livelihoods of Americans whose families have worked the land for over 100 years, paid taxes on their property, and supported their communities. These American do not deserve to suffer the theft and destruction of their land and family heritage. Further, the project will destroy watersheds and wildlife habitat, and pollute the land and water. There is no coal mine/railroad complex in the world that has not had such adverse effects.

The project will essentially trash and land and the lives of rural Montana residents to pad the pocketbooks of speculators and snake-oil salesmen. There are absolutely no long-term markets for this coal, and no established short-term markets.

This project is not in the public interest. Please do you job in a fair manner, and choose the "no action alternative" for the Tongue River Railroad. It should not be constructed.

Sincerely,

Mr. Hugh Zackheim

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Ljiljana Milic

LEAVE ALL FOSSIL FUELS IN THE GROUND.
82% of Fossil Fuel Reserves must be LEFT IN THE GROUND - 82%! -
if we are to avert Climate CATASTROPHE due to Global Warming.
NO MORE drilling, coal mining, fracking,
and transporting, leaking and spilling and exploding,
and BURNING and spewing into the Atmosphere.
NO MORE exploration for new sources!
This should be Environmentalists' MANTRA:

LEAVE FOSSIL FUELS IN THE GROUND.
==========
Leave the Oil in the Soil
the COAL IN THE HOLE
the TarSands in the Land.

Eliminate ALL use and extraction of Dirty Fossil Fuels for Energy, NOW!
ASAP

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Ted Fishman

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Jeremy Steadman

Dear MT Surface Transportation Board Blodgett,

Please oppose the Tongue River Railroad and urge STB to take the "no action alternative."

This railroad's sole purpose is to haul coal from Otter Creek to export markets at a time when coal markets are crumbling.

Do not sell out to a speculative railroad and mine.

There is no domestic coal market for high-sodium Otter Creek coal,
There will be train traffic impacts fromh 18-26 additional coal trains per day traveling on existing rail lines.
Rail communities in between export terminals will experience slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company.

This railroad is not in the public interest.

Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. mauricio carvajal

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Judith Susser

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. andreas vlasiadis

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Lorenz Steininger

MT Surface Transportation Board Ken Blodgett MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative."
This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when
coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek
lease, is in financial ruins.
Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve
better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal,
and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could
generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between
the proposed railroad and Pacific Northwest export terminals would suffer the consequences of
dramatically increased coal train traffic, including slashed property values, increased traffic congestion,
safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River
Railroad company. This is not in the public interest. Please choose the "no action alternative"
for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative."
This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when
coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek
lease, is in financial ruins.
Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve
better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal,
and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could
generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between
the proposed railroad and Pacific Northwest export terminals would suffer the consequences of
dramatically increased coal train traffic, including slashed property values, increased traffic congestion,
safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River
Railroad company. This is not in the public interest. Please choose the "no action alternative"
for the Tongue River Railroad.

Sincerely,

Mr. D P

MT Surface Transportation Board Ken Blodgett MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative."
This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when
coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek
lease, is in financial ruins.
Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve
better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal,
and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could
generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between
the proposed railroad and Pacific Northwest export terminals would suffer the consequences of
dramatically increased coal train traffic, including slashed property values, increased traffic congestion,
safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River
Railroad company. This is not in the public interest. Please choose the "no action alternative"
for the Tongue River Railroad.

Sincerely,

Ms. Kelsey Severson

MT

Dear MT Surface Transportation Board Blodgett,

Why don't government agencies QUIT GIVING AWAY COAL OPTIONS at "bargain basement" prices to these extractors? This stuff should stay in the ground for awhile... until someone REALLY NEEDS IT!

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. This project would encourage coal mining and export to China, where it would contribute to climate change. It is therefore in conflict with our national goal of protecting the environment from carbon dioxide atmospheric pollution.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Irene Weiler

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Jerry Miller

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Philip Jurries

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. Judae Bost'N

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I live in a community in which people I know on the rail route and special places I enjoy would be impacted the increased transport and export of coal. The Tongue River Railroad would directly facilitate the mining and transport of coal for export, and I believe communities from mine to rail port to plant should be protected from the impacts of mining and transporting coal. I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

It's time to end the greed-driven efforts of detrimental energy industry interests. We've destroyed enough of our land and air, wildlife habitat, quality of life and sacred trusts. Please stop these efforts of Arch Coal and it's partners before they irreversibly damage the lives, livelihood, and habitats of all beings - human and otherwise - along this proposed, and unnecessary railway. Thank you for responsibly considering the future of the Pacific Northwest region.

Sincerely,

Ms. Adele Peters-Johnson

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I expect that the STB will take the "No Action Alternative' and deny the development of the Tongue River railroad. I oppose this railroad because it's sole purpose is to export coal from Otter Creek when coal markets are falling and will continue to for some time. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial trouble and cannot be counted on. Montana ranchers, Northern Cheyenne tribal members, and community members along the rail line -- like me and my family in Bozeman -- know this will be a speculative disaster and oppose it.

There is no domestic coal market for high-sodium Otter Creek coal. The 'improvements' on the rail line will divide our city and cause lots o economic and social problems. None of which the coal company will pay for -- we will. This rail line will lead to 18-26 additional coal trains per day traveling through my community. All our rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust. For what purpose? So that the executives from Arch and the Tongue River Railroad company can make a big profit at the expense of the country, communities and the landscapes and add lots more carbon emissions to climate change. Why send our coal to China and other export markets? The climate needs us to keep the coal in the ground and so does out long term energy future.

Please be smart and brave -- choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Barbara Rusmore

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Daniel Holmberg

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Nolen Scott

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Charles Hughes

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Ellen Zarter

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

I am an atmospheric scientist who has carried out extensive studies of transport processes in the atmospheric boundary layer. I am also a resident in downtown Seattle very near BNSF tracks and am very concerned about the additional pollution that increasing numbers of coal trains will be adding to our already polluted air.

Thank you for your consideration on this matter.

Sincerely,

Dr. Bernard Walter

Dear MT Surface Transportation Board Blodgett,

I DEFINITELY OPPOSE CONSTRUCTION of the Tongue River Railroad and urge the STB to take the "no action alternative"!! This railroad's SOLE PURPOSE is clearly to haul coal from Otter Creek to export markets at a time when COAL MARKETS ARE CRUMBLING! ARCH COAL, part owner of the railroad and the owner of the Otter Creek lease, is IN FINANCIAL RUINS. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a "speculative" railroad and mine!!

The draft EIS WRONGLY ASSUMES that there is a domestic coal market for high-sodium Otter Creek coal, and WRONGLY ASSUMES that there will be no train traffic impacts from construction of a rail line that could generate 18-26 ADDITIONAL COAL TRAINS PER DAY traveling on existing rail lines. Good grief!! Rail communities between the proposed railroad and Pacific Northwest export terminals would SUFFER the consequences of dramatically INCREASED coal train traffic, including SLASHED property values, INCREASED traffic congestion, SAFETY HAZARDS, and AIR POLLUTION from both diesel exhaust and fugitive coal dust.

The ONLY BENEFICIARIES of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is NOT in the public interest!! Please choose the "NO ACTION ALTERNATIVE" for the Tongue River Railroad!!

Sincerely,

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Dirk Singletary

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. mike wind

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Miss Pearl Gilman

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Dianne Kocer

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Gordon Wood

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Heidi Shuler

Dear MT Surface Transportation Board Blodgett,

I live in WA state and my daughter lives next to the railroad going over the locks. The coal dust is already noticed at times and this new railroad will make air pollution worse. We need to convert to renewable energy and so does China. We now know we are getting pollution from China via our winds. We need to leave coal in the ground instead of destroying our earth for our kids and grandkids.
I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Tom Harding

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Joanne Kellabrew

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I find it horrifying and sad that you would even consider approving the construction of the Tongue River Railroad (TRR). Arch Coal is a company that has done harm to our environment on a huge scale. It is failing financially due to the low cost of coal.

We as a country are not using coal at the pace of the twentieth century. We know coal is the worst fossil fuel for the environment. Even China is moving away from coal. It is time to stop expanding coal mining and start phasing it out.

Ranchers have been in that valley for generations and should be able to continue to ranch undisturbed by Polluting coal trains. The current plans cuts off some ranchers from the river - something crucial to the ranching business. Why should Arch Coal and other TRR investors be able to gain money at the risk of ruining other peoples land?

This unreasonable plan to build the Tongue River Railroad is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Deb Fischer

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Cedric Reuter

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. K Crewe

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Rita Nicholson

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Ilse Burch

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Howard Pellett

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Diane Shisk

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Jennifer Calvert

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Sherrie Marston

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Barbara Micheel

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. A Leon Guerrero

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Stephen Cooper

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad because coal and all actions associated with it are bad for humanity and the planet. It is time to switch to renewable resources and efficiency.

Sincerely,

Mr. Mark Dix

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Rick Barrett

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Ruth King

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Lisa Agard

The bottom line is that coal needs to remain in the ground. It is time to focus on renewable energy and stop using fossils fuels and coal has got to be the first to go.

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Cornelia Teed

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Lisa Reager

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. Richard Voget

Dear MT Surface Transportation Board Blodgett,

Unlike the multitude of brain-dead loonies you'll undoubtedly be hearing from, I enjoy having all the modern conveniences like steady, reliable electricity. As coal is our must abundant fossil fuel, it's essential that it remains a key element in this nation's power grid for many years to come. If these enviro-extremists had their way, we'd be stuck in our cold, dark houses as rolling brownouts became the norm. And of course these same naive morons would be the loudest complainers.

I also understand that there is no inherent danger in transporting coal via rail. I challenge these mental midgets to point out the trail of dead people, livestock, and crops along this nations extensive rail network. They can't, of course, but that won't stop them from continuing to make blatantly false claims about "harmful toxic coal dust."

In closing, Mr. Blodgett, I encourage you to truly examine the issues at hand and quit letting a very vocal, but inherently wrong minority determine the future of this country solely because they've become so adept at controlling the media.

Sincerely,

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. John Teegarden

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling and my state of Washington is BURNING UP!

In the Columbia River Gorge National Scenic Area where I live, we are regularly subjected to wildfires sparked by BNSF trains. The traffic is picking up, and projected to pick up much more when terminals to export coal, LNG and Bakken crude are built. Will Congress pull the "Scenic," from the Act?

The increased coal trains put this special place at risk on many different levels: safety, air pollution, economic disruption, traffic congestion and fire, fire, fire! The Gorge is a major water-based recreation mecca, but the rails run along both sides of the river and create a barrier to access. We lose a few tourists to the trains every so often. It stands to reason that if there are more trains, we'll lose more folks.

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would ALL suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and HIGHLY FLAMABLE fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative"

for the Tongue River Railroad.

Sincerely,

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Danielle Marceaux

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Miss Cami Cameron

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Anne Dittmer

Dear MT Surface Transportation Board Blodgett,

This is dark ages thinking and a waist of life. Montana and all resource states have more than dirty coal to offer. The rail system is a joke and should be innovated (already available) and completely redone to move most materials and people. And no, no coal is needed nor fossil fuels to run new trains. STOP BEING IGNORANT by supporting profit damage and insanity. Create the new please.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Phyllis Robinson

Dear MT Surface Transportation Board Blodgett,

Please say "no action" for the Tongue River Railroad. The negative impact for affected communities will be greater than the benefits to Arch Coal. No coal operation should be privileged to profit when the local communities must suffer. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better treatment.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Norine Grace

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Elizabeth Scranton

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Peter Asprey

Looking at the course of technological development, it should be clear that coal is becoming obsolete (solar is already competitive in several high-sunlight areas). We don't need to endanger natural habitats for the sake of a resource that harms the climate when used - especially when superior alternatives are right around the corner.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Quincy Maret

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. James Boorn

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Eycke Strickland
613 Cedar Park Dr

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Michaella Grauberger

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mrs. Bob Hicks

Coal in general is a dirty energy source and needs to be abandoned so we and our children can breathe a little easier. Simple things like turning the thermostat up in summer and down in winter can save tons of energy.

Sincerely,

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Alanna Taylor

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. Judith Wright

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Sergei Dobroshinsky

MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

Dear MT Surface Transportation Board Blodgett,

Yeah, if there's one thing the US needs, it's more coal. If we'd just get rid of coal-fired power plant air quality regulations, they could fill the air so full of particulates that it would block out the sun and put an end to global warming. I mean, it might even bring on a new ice age. Sounds like a plan.

Seriously, we desperately need to cut coal out of our energy equation and anything that makes more coal available to be burned is a terrible idea.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Dr. Katherine Evans

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Hamilton Dutcher3

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative."
Climate change is real to me here in Northwest Washington. Weather forecasters are projecting a dryer and warmer weather pattern through October 2016. This current drought is killing native trees already as of August 2015. Stronger weather are also projected. These trees are an extreme fire hazard.

At 72 years old, I have never seen these weather conditions before. Burning coal in Asian markets has an impact here on this historic maritime climate. A radical reduction in atmospheric carbon emissions is for a healthy future.

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Roger Darden

This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

This is also a climate change issue. Leaving coal in the ground, rather than shipping across thousands of miles to be burned overseas is not prudent policy at this point in time.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Nadine LaVonne

Dear MT Surface Transportation Board Blodgett,

Please chose the "No action alternative." Coal is last century's fuel source and is the major cause of global warming, so why on earth are you even considering allowing the Tongue River Railroad to be built? This will only exacerbate global warming as it gets burned in Asia and will subject millions of people to coal dust from trains going through their neighborhoods. Alternative energy is our future, so trying to revive the coal industry so a very few already rich Arch and Tongue River Railroad CEO's can get even richer, is wrong on so many levels. Enough dirty energy already - it's killing us. China needs to start ramping up their own alternative energy sources and stop trying to turn the PNW into their very own giant dirty energy export terminal.

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Hello out there! No more coal mining! No more support of dirty energy forms. They are killing us and the Earth. NO ACTION ALTERNATIVE for the Tongue River Railroad.

Sincerely,

Ms. Catherine Ruha

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Shari Bruun
631 NE Garfield St

Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. alex massey

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. K Hardiman

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Jacob Miner

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

MT Surface Transportation Board Ken Blodgett
MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad.

Consider this: "U.S. study says air pollution killing 4,000 daily in China"
article in the Seattle Times -August 2015.

The study announced Thursday blamed emissions from the burning of coal,
both for electricity and heating homes.

Physicists at the University of California calculate that heart, lung, and stroke
problems resulting in death are caused by incredibly polluted air, especially
small particles of haze.

Unlike the U.S., air pollution in China is worst in winter because coal is burned
to heat homes, and weather conditions keep dirty air closer to the ground.

Please consider the above together with all the other reasons given to stop
the Tongue River Railroad. Who wants to be contributing to the death of
that many people?

Thank you for your consideration.

Sincerely,

Miss Patricia Daly

Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. David Tarico

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins. Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Karen Swinger

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Ms. Lindsey Weedston

MT Surface Transportation Board Ken Blodgett MT

Dear MT Surface Transportation Board Blodgett,

I oppose construction of the Tongue River Railroad and urge the STB to take the "no action alternative." This railroad's sole purpose is clearly to haul coal from Otter Creek to export markets at a time when coal markets are crumbling. Arch Coal, part owner of the railroad and the owner of the Otter Creek lease, is in financial ruins.
Montana ranchers, Northern Cheyenne tribal members, and community members down rail deserve better than to be sold down the river to a speculative railroad and mine.

The draft EIS wrongly assumes that there is a domestic coal market for high-sodium Otter Creek coal, and wrongly assumes that there will be no train traffic impacts from construction of a rail line that could generate 18-26 additional coal trains per day traveling on existing rail lines. Rail communities between the proposed railroad and Pacific Northwest export terminals would suffer the consequences of dramatically increased coal train traffic, including slashed property values, increased traffic congestion, safety hazards, and air pollution from both diesel exhaust and fugitive coal dust.

The only beneficiaries of the Tongue River Railroad will be executives from Arch and the Tongue River Railroad company. This is not in the public interest. Please choose the "no action alternative" for the Tongue River Railroad.

Sincerely,

Mr. Darin Jones
