Transcript:

I'm expressing my concern against this merger for the following reasons. I'm strongly against it because of the environmental impact with the hazardous waste materials, which would be transported through the rail system. Also, so much of the track is only single track going through our community, to increase the traffic five times what currently is, the Canadian National should be made responsible for putting in double tracks to ensure the smooth flow of traffic. I'm concerned about the sound impacts from all this increased rail traffic, they should be required to create sound walls to preserve property values, which would definitely decrease if nothing is done to stop them. So, this is the reasons that I'm calling. Thank you
