

Dave Navecky,

Please do not let the GLBT Railroad project happen.

Farming isn't just a hobby, farmers can't just pick up and find another spot. The soil here is precious, some of the best in the country. Farmers have dedicated their lives to the land that was very likely handed down from generation to generation.

Developers look at a map and see space they think is waiting for them, they don't get it. Cutting through farm land is a crime committed by people who value nothing but money with no regard for the people who live there. What people need and want are often confused, use the existing tracks!

Please listen to the people who are against this, its important for many reasons I haven't even mentioned.

Respectively, Caryn Conway
