Subject
Canadian National/EJ&E

Surface Transportation Board,
Please help stop the additional trains from coming through our towns. Route 59 & Route 14/Northwest Highway are already difficult to traverse due to the number of towns and villages that must travel through Barrington to get to Rt. 53 or I90. We have one of a handful of north/south roads and traffic is unbearable as it is. It takes me 40 minutes to get from my house to Station Middle School at 3:00 in the afternoon when I absolutely have to pick up one of my children. If these trains begin to come through here, the only possible way around is via Rt. 12/Rand Road and then I would still get stuck on Ela Road south and use extra fuel to go so far out of the way. There is no way around the trains. The suburbs that have been dealing with these trains for so many years have been installing bypasses at great cost to the communities. Why start the whole bypass process over in new communities? Please help us stop Canadian National/EJ&E from grinding traffic to a halt in the Lake Zurich, Barrington, Fox River Grove, Cary, etc. communities. Thank you.

Mrs. GA Bach
Lake Barrington, IL resident
