Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

STB Finance Docket No. 35087

Date: 8/27/08

Comments must be submitted by September 30, 2008.

The DRAFT Environmental Impact Statement is seriously lacking assessment & insight in a variety of areas -

1) Safety - Please visit LHHS at Berrington HS & May Whithay School (Lake Zurich) & all the other schools along the tracks - Safety of these children will be severely impacted by crossi-
ng need for frequent crossings - playing football along the tracks,
noise - air pollution - & inability to access public services
(fire/police/emergency)

2. Health well-being - See how tracks dissect fire - police from town residences - in Lake Zurich, will be dead before the services can cross the tracks (tracks dissect town in the 2 major access routes - see for yourself - who use fire trucks)

3. Unter Source - Unlike the other - but on CN we use wood water - Not just Barryton - Lake Zurich - Hanting Wood, etc all in one boat - one for a spell & we have Nothing!

4. TRAFFIC - Unlike existing towns on CN we don't have expressway access but we do have several other connectors using our roads & thoroughfares - Please VISIT Rt 12 in Lake Zurich & Rt 14 in Barrington - during the day - Even in non-Rush hour periods these Roads are jammed. There is NO way I will be able to get from LZ to Jct. Highway (west side) not Woodfield without crossing B/E tracks - It could well take us 20 minute train! Our roads will be at a CRAWL - NO Expressway - TRAIN Blockage - ~~At~~ Multitypes! YOUR INPUT IS IMPORTANT! Connectors on these Roads = Disaster!

YOUR INPUT IS IMPORTANT!
