How will CN's proposed acquisition of the EJ&E impact you?

- 1) It will impact commute times drastically in this time. Prior to building the by-pass, traffic was backed up for miles. This would only add to the congestion again for our community and the surrounding area.
- 2) Are these railways truly necessary with the impact they will cause in terms of congestion, safety, proximity to schools, air & noise pollution.

We must stop this. If it is necessary, which I don't believe it is, consider routes where there is more open space. We will all pay the price for this Canadian Company's desire to build a railway super highway!

Signed

P.S. Who will fund all of the overpasses that we will need?!!
