Environmental Impact Statement

I am extremely concerned about the safety of our school children who are transported to our schools by bus. Our school district buses must cross railroad tracks over 800 times per school day. The increased train traffic is a very real safety concern. To insure that our children are safe on the bus enroute to and from school every day is most crucial. We have suffered several tragedies involving the trains in our community and the threefold increase in traffic will raise the risk of accidents to unacceptable.

Please put the safety of our communities children BEFORE freight. Can you guarantee that they will be as safe after the increase in traffic as they were before? Please think hard about that. Do the right thing.

Thank you!
