How will CN's proposed acquisition of the EJ&amp;E impact you?

1. It will affect my access to Loyola Hospital and add many additional minutes of travel time - possibly in a critical emergency situation.
2. Fire department trucks, ambulances, and police cars could encounter situation of lengthy trains or stopped trains blocking access to neighborhoods on the other side of the tracks. Five, ten, fifteen minutes can be critical.
3. We have 4 crossings within a mile of our home. We would need to travel a minimum of 5 miles to go east.
4. As a school secretary of a school within 1 block of the tracks, I am concerned about accidents and release of hazardous materials.
5. Transportation of students to and from school could be impacted by lengthy trains or train stopped on the tracks.
6. Big problems - no minutes. Tanya L. Huntington
