

Hello, my name is Matt Brisbois, I have worked for BNSF railway in the MOW department since 2007. I also serve as a treasurer for my local union lodge in Minneapolis, MN. After hearing the testimony from customers, our union leadership and the railroads I have my own firsthand thoughts that I would like to share. I apologize if my thoughts come off as harsh or crass, but the fact of the matter is that the railroads are far harsher than I could ever illustrate. I would also like to take the time to thank you for taking the time to address the issues that I believe the railroads have caused that stem from greed and manipulation ultimately caused by investors and their ruthless need to acquire wealth.

Admittedly in my experience and through conversations with people that work for other major railroads BNSF has been the most moderate when it comes to the implementation of PSR, however these changes have not been minor. I have seen cutbacks in our tie programs and rail programs for years, delayed capital projects, a total negative progression in the maintenance of our railroads. These cutbacks then justify reduction in manpower. Which then leads to less productive utilization of time and resources, which then leads to more cutbacks that have created this downward spiral of maintenance. PSR has also taken all pride and enthusiasm from our work force. One of the jobs I have had over the last few years is a machine operator on a tie gang. I specifically run a Tripp machine (machine used for inserting ties underneath the rail). We have daily goals of around 2200 ties per day, last year our tie gang outperformed all other tie gangs, all while being shorthanded and leaving machinery tied down that we were not capable of running, due to lack of manpower or lack of material to repair said machinery. After having a high-performance year despite all the obstacles, there was no reward, there were some cheap praise, and only to be welcomed back the following year with lower manpower headcounts and less machinery to do an already physically exhausting job, as well as increased production goals. I give you this example to illustrate that good work doesn't go unnoticed, it is punished. There is no incentive to work hard, if we do forces will just be diminished even further while production goals remain the same or are increased. There is no investment not only into the infrastructure, but into the workforce that maintains our railways. Working hard has proven only to lead to a larger workload, that coupled with lack of wage increases and general willingness to bargain in good faith have led to the massive resignations. We lack the tools, material and manpower to effectively maintain a railroad and there seems to be no plan to remedy this.

As I mentioned above the treatment of employees has been at the forefront of many resignations. I myself have endured difficulty balancing an unreasonable workload, coupled that with an inability to allow employees to use vacation time has created a high stress environment. During the hearing I heard it mentioned by Chairman Oberman, that he is aware of the railroads subtle use of intimidation. I agree with his statements wholeheartedly, and I will add that this is the culture that runs deep through the ranks of all railroads, it can become a very toxic environment if you aren't willing to "play ball" and essentially cut the corners they expect you to in order to hit FRA deadlines. I would invite you to look up *Donald Sanders v. BNSF Railway*, a very recent case with a former co-worker of mine that was terminated for this very type of thing. This is no doubt a very extreme example, but on a daily basis employees are denied time, due to manpower shortages, cuts in pay from work past performed, where we are essentially expected to prove that we did in fact work what was recorded in our time roll, harassment in the form of being told we're greedy for paying ourselves through lunches or working jobs with per diem instead of headquartered jobs. The list goes on and as I mentioned earlier, its subtle but it is palpable.

Finally, I would like to address the future of our railroads from my perspective. In my humble opinion the Railway Labor Act has failed the American railroader. There has been almost no attempt from the carriers to bargain in good faith or even come to the bargaining table. I can honestly say that striking is one of the last things that myself or any co-worker would want to do. We take pride in our work, furthermore we go to work for a paycheck, going without pay for any amount of time would significantly affect most railroaders more than they would want to attempt to weather. I would suggest that there should be harsher penalties, or more clarity in how they are supposed to bargain in good faith. Accountability is what the railroads try to force on their employees, maybe it's time for them to be held accountable for their action or in this case inaction. To illustrate the railroads position I attached a screen shot of their advertised positions on our division, along with that a document that shows how many available positions there are. You will notice that there are about 11 posted jobs available to apply for, the other document I attached shows the available jobs that are currently unfilled just in the Minnesota, North and South Dakota territories, which is over 90. I find it hard to believe that there is any sincere effort on behalf of BNSF to remedy their

manpower issues with this lackluster effort. I also know that this board is designed to overseeing the economic impacts and remedy issues more in-line with supply-chain. It's no secret the largest of the railroads issue is very clearly the lack of manpower, I know this board doesn't settle collective bargaining, but I urge you to use any authority or political power to persuade any PEB or arbitrator to push the railroad for significant concession as the railroads are not willing to make them on their own. I've had conversations with employees from all crafts and the general consensus is that if we are forced to make further concessions to our work rules, healthcare and already stagnant wages more employees will resign. Many simply waiting to see how bargaining turns out to make their final decision and if it goes poorly, it will be several more years before repair to our weakened workforce can be repaired. I will just briefly explain that if our wages are not competitive now, that another weak contract will make the job unattractive to any potential future employees and this cycle will continue until at the very least we settle a future agreement.

I would like to conclude by thanking you for your time to listen and address issues in what I hope to consider a career. I strongly oppose the PSR railroading model of deferring maintenance and expenses because we all know that there will be a time to pay the piper for this conduct. The treatment and disrespect for honest blue-collar workers has gone on long enough. We are not manpower units, we are people with lives, families, hobbies and responsibilities, at times its downright inhumane how our needs are ignored. I would also like you to address bargaining in any way you can, because this is at the root of many service issues. I truly believe that a fair contract will retain employees, as well as attract new ones that will help promote growth to this industry and remedy supply-chain issues at a sustainable level. Please feel free to reach out and contact if I can be of any service.

Respectfully, Matthew Brisbois  
Secretary-Treasurer Lodge 144

To prevent possible disqualification from your DOT position, please read the following information as the process of DOT qualification has changed and you will possibly need to provide information concerning certain conditions at the time of your DOT examination.

As a reminder, all employees who hold a commercial driver's license (CDL) must provide their state's driver license agency with a copy of their medical examiner's certificate. This is the CDL holder's responsibility.

Dear BNSF DOT Driver,

The DOT medical certification process has changed in the recent years due to changes in government regulations. In order to prevent you from being temporarily disqualified or from receiving a limited DOT certification, **you will need to provide all pertinent medical information at the time** of your certification or your recertification physical exam.

In order to assist you in this process we are **strongly** advising you to bring information with you to your physical examination if you have any pre-existing medical conditions. Please be advised that some medical examiners may require more information than what is stated below. It is ultimately up to the medical examiner what information is needed. Neither BNSF nor our vendor, CHSi, control what information a medical examiner may request.

Below is a list of **our most common conditions** and the information most medical examiners may wish to see:

- **Diabetes:** Medication list, recent HgbA1c, last office visit note and/or a letter from doctor summarizing your case and indicating functional activity restrictions and compliance with treatment. If you are using insulin, then please also supply at least 6-8 weeks of glucose monitoring logs and statements from your treating provider describing your history of hypoglycemia. If you currently possess an insulin waiver, please bring a copy with you.
- **Obstructive Sleep Apnea/Other Sleep Disorders:** Medication list, last office visit note and/or a letter from doctor summarizing your case and indicating functional activity restrictions and compliance with treatment. If applicable, submit a copy of your last sleep study report, any recent sleep specialist evaluations done within the last 12 months, and a current CPAP usage report for at least the last 3 months, preferably the last 12 months. "Adequate usage" is generally defined by the driver using CPAP greater than or equal to four hours per day 70% of the days.

- **Cardiac history of heart failure, coronary artery bypass/stents, and/or heart attack:** Medication list, last cardiology office visit note done within the last 12 months and/or a letter from the cardiologist summarizing your case and indicating functional activity restrictions and compliance with treatment. Copy of last echocardiogram report and/or stress test report.
- **Cardiac Arrhythmia (abnormal heart rhythm like atrial fibrillation, etc.):** Medication list, last cardiology office visit note done within the last 12 months, results from any diagnostic testing performed within the last 12 months, and/or a letter from the cardiologist summarizing your case and indicating functional activity restrictions and compliance with treatment. If you are currently using blood thinners such as Coumadin/Warfarin that require laboratory monitoring, then please also supply laboratory reports of your most recent INR's for the last 3-6 months. If you have a pacemaker or a defibrillator, please bring copies of device checks, including battery life.
- **Cardiac Valve Conditions or Valve Replacements:** Medication list, last cardiology office visit note done within the last 12 months, results from any diagnostic testing performed within the last 12 months, and/or a letter from the cardiologist summarizing your case and indicating functional activity restrictions and compliance with treatment. If you are currently using blood thinners such as Coumadin/Warfarin that require laboratory monitoring, then please also supply laboratory reports of your most recent INR's for the last 3-6 months.
- **Seizures/Epilepsy or Other Chronic Neurologic Conditions (such as Parkinson's Disease, Multiple Sclerosis, etc.):** Medication list, last neurology office visit note done within the last 12 months, results from any diagnostic testing performed within the last 12 months, and/or a letter from the neurologist summarizing your case and indicating functional activity restrictions and compliance with treatment. If you are currently using anti-seizure medications such as Dilantin that require laboratory monitoring, then please also supply laboratory reports of your most levels for the last 3-6 months. If you currently possess a seizure waiver, please bring a copy with you.
- **Chronic Pain Conditions:** Medication list including dose and frequency of use. Office visit notes or a letter from the treating provider summarizing the condition being treated to include complete history, current functional status, treatment plan, any recommended activity restrictions, medication side effects, and prognosis. Please also include reports from any clinically pertinent diagnostic studies, if applicable.
- **Potentially Impairing Medications (Examples include, but are not limited to, medications such as narcotics, benzodiazepines, muscle relaxers, sedative-hypnotics: Xanax, Norco, Flexeril, Robaxin, Ambien, Provigil/Nuvigil, etc.):** Medication list including dose and frequency of use. Office visit notes or a letter

from the treating provider summarizing the condition being treated to include complete history, current functional status, treatment plan, any recommended activity restrictions, medication side effects, and prognosis. Please also include reports from any clinically pertinent diagnostic studies, if applicable.

- **Eye Conditions, other than those corrected by glasses or contact lenses:** Medication list, last ophthalmology office visit note done within the last 12 months, results from any diagnostic testing performed within the last 12 months, and/or a letter from the ophthalmologist summarizing your case and indicating compliance with treatment and any recommended activity restrictions. If you currently possess a vision waiver, please bring a copy with you.
- **Glasses/Contact Lenses/Hearing Aids:** Please insure that you have completed your usual annual exams with your personal treating providers PRIOR to your DOT examination so that your devices are up to date to meet standards. Please be sure to bring your glasses and/or hearing aids with you to your DOT exam.
- **Hypertension/High Blood Pressure:** If you have a history of high blood pressure, please insure that you are taking your medication prior to the DOT examination. Consider having your regular check-up with your own doctor prior to scheduling your DOT exam to insure your blood pressure is well controlled for the DOT exam. If your blood pressure is well-controlled, no further information should be necessary.
- **Other:** Please note that, in general, if you have any significant medical history, recent hospitalizations, surgeries, and/or any medical procedures you will need to provide documentation of these events, the outcome and clearance from your treating provider stating that the condition is resolved or stable, and your provider's recommendation on any functional activity restrictions. Please insure this documentation includes a medication list, last office visit note and/or a letter from doctor summarizing your case.

If you have any questions regarding what information is needed or if you have a condition that is not listed above and are unsure what information is needed, please feel free to contact CHSi at 877-780-2673.

As a reminder, all employees who hold a commercial driver's license (CDL) must provide their state's driver license agency with a copy of their medical examiner's certificate. This is the CDL holder's responsibility.

Thank you for your assistance in this matter.

# DID YOU KNOW?

**DID YOU KNOW** Workforce Support no longer requires your social security number on forms? Bid forms, Rule 19 A forms can be submitted using only your employee id.

**DID YOU KNOW** there are other options available to MOW employees to receive and update Employee Information. With Engineering Online Connection available via the internet; employees can:

- View their Seniority
- Check Current Qualifications
- Get Current Assignments
- See Current Bids
- View and/or Update Contact Information
- Place your own Bump
- Go to Vacation Scheduler
- Enroll yourself on the FRA Tier II Waiting List
- Submit a Floating Vacation Request
- Submit bid(s) online through the EOC
- Submit a 19A request through the EOC

Another option is through the existing IVR, instead of going directly to Workforce Support, you can choose these prompts to access and update Employee information. After you log in to the IVR, you can select:

- **1** for Employee Information
  - Then **1** to review current and upcoming assignments
  - Or **2** to review your current Qualifications
  - Or **3** to confirm that your employee vacation choices have been received.
- **2** for Job/Bump Placement Options
  - Then **1** to hear Bump Options
  - Or **3** for a Bid verification list for Bulletined Jobs
- **3** for updating Telephone Numbers
  - Then **1** to add a new Number
  - Or **2** to change an existing Number
  - Or **3** to terminate an existing Number
  - Or **4** to prioritize Numbers for receiving notifications
  - Or **5** to hear existing Numbers
- **4** for Phone number to Timekeeping
- **5** for Santa Fe Bid lines
  - Then **1** for Southwest (600) Track bid line
  - Or **2** for Kansas (700) Track bid line
  - Or **3** for Texas (800) Track bid line
  - Or **4** for Former Santa Fe Welders bid line
  - Or **5** for Former Santa Fe Structures bid line
- **7** for Security Options
  - Then **1** to receive e-mail of current password
  - Or **2** to review current e-mail address
  - Or **3** to change password
- **8** To Repeat Options
- **9** to exit the IVR
- **0** to go to Workforce Support

## **Maintenance of Way Bulletins Must Be Printed and Posted By Gang Foremen**

---

### **REMINDER:**

All foremen are required to print and post bulletins and awards using the BNSF Web.

When printing the bulletins, foremen must print all districts that apply to the employees at their location. This includes any common point districts, pre-merger districts or any overlapping machine districts.

### Web Instructions

A link to "Bulletins and Awards" is available on the Engineering Department home page under the Manpower Planning icon. You can also navigate to the Bulletins and Awards by clicking on the "Manpower" link on the left side of the Engineering Home page.

Foremen must print both the bulletin and the award and post them in the proper location.

Should you encounter any problems, contact the Workforce Support Help Line at company line 8-867-5900 or toll free 866-669-2673.

# **Welding Training Courses: Online Enrollment Update**

Employees interested in enrolling for welding courses at the Technical Training Center (TTC) can do so at:  
<http://depot2.bnsf.com/team/TrackWelding/ElectricThermiteWelding/Forms/AllItems.aspx>

## **The following welding courses are available:**

**Note:** As a prerequisite for Track and Structures welding courses, employees must first successfully complete the W01 Welding Prequalification computer-based training (CBT) test.

## **Track Welding**

Classes should be taken and successfully completed in this order before enrolling for the next class:

1. WT2 Qualification Group (either class):  
Thermite Welding  
Basic Welding
2. WT3 Qualification Group (either class):  
Frog Welding  
Rail and Switch-Point Welding

## **Structural Welding**

Classes must be taken and successfully completed in this order before enrolling for the next class:

1. Basic Welding
2. Structural Stick Welding
3. Structural Wire Welding
4. Structural Piling Welding

Structures courses will be filled in seniority order based on Structures hire date.

## **Enrollment Priorities for Track Welding Courses**

Vacancies for all Track welding courses will be assigned to employees who have signed up online for these classes in the following order:

1. Employees with welding sub-department seniority will be assigned first and in seniority order.
2. Employees with no welding sub-department seniority who have current assignments will be assigned last and in seniority order.

Assigned employees will be notified by Workforce Support 30 days in advance (by Email and phone call) of the course they have been enrolled in.

## **Cancelling Enrollment in a Track or Structures Welding Course**

If you receive Email notification of enrollment in a welding course, you will have ten-days from the date of notification receipt to cancel yourself from the course by visiting the link above and selecting the "I Wish to Change My Assigned Class Date" option. Please provide comments on why you cannot attend the assigned class date before you submit your cancellation request. If you are outside of the ten day window for cancellation, you will be expected to attend the course unless there is a verifiable emergency that would preclude your attendance. Failure to attend a course without properly completing the cancellation process will result in disciplinary action (emergencies will be reviewed on a case-by-case basis)

# Track Welding Qualification Process

## What is required for a Grinder position?

- An employee can bid and be awarded a Grinder position with the W01 and BOR (Book of Rules) pre-qualifications. Depending on the weight of the truck paired with the gang, CDL and DOT may also be required pre-qualifications.
- Once an employee has gained a new Grinder seniority date and a WTT qualification, the employee has 18 months from their Grinder date to successfully complete the **Thermite Welding** course. Successful completion of the Thermite Welding course will extend the WTT qualification to 12/31 three years after the end date of the course.
- Once the Thermite Welding course has been completed, the employee must take the **Thermite Welding Review** field course every three years to remain qualified.

Please contact a Welding Supervisor to sign up for Thermite Welding or Thermite Welding Review field courses.

## What happens if an employee does not complete the training within 18 months (WTT) or requalify before the WTT qualification expiration?

- Failure to complete the Thermite Welding course within 18 months of gaining a new Grinder date or the Thermite Welding Review field course every three years after completing the Thermite Welding course will result in a WTTX restriction. In addition, the employee will not be allowed to displace, be awarded by bulletin or be honored to relieve a Grinder position.

---

## What is required for a Welder position?

- An employee can bid and be awarded a Welder position with the W01 and BOR (Book of Rules) pre-qualifications. Depending on the weight of the truck paired with the gang, CDL and DOT may also be required pre-qualifications.
- Once an employee has gained a new Welder seniority date and a WT2 qualification, the employee has 18 months from their Welder date to successfully complete the **Thermite Welding** and **Basic Welding** courses. Successful completion of the Thermite and Basic Welding courses will extend the WT2 qualification to 12/31 three years after the end date of the course.
- Additionally, once an employee has gained a new Welder seniority date, a WT3 qualification will be granted and the employee will have 30 months from their Welder date to successfully complete the **Frog Welding** and **Rail & Switch Point Welding** courses. Successful completion of the Frog and Rail & Switch Point Welding courses will extend the WT3 qualification to 12/31 three years after the end date of the course.
- Once the courses required for the WT2 and WT3 qualifications have been successfully completed within 18 and 30 months, respectively, the employee must take the **Thermite Welding Review** and **Welding Review** field courses every three years to remain qualified.

Please contact a Welding Supervisor to sign up for Thermite, Basic, Frog, Rail & Switch Point, Thermite Welding Review field or Welding Review field courses.

## What happens if an employee does not complete the training within 18 months (WT2) or 30 months (WT3) or requalify before the WT2 and/or WT3 qualification expiration?

- Failure to complete the Thermite and Basic Welding courses within 18 months of gaining a new Welder date or the Thermite Welding Review and Welding Review field courses every three years after completing the Thermite and Basic Welding courses will result in a WT2X restriction. In addition, the employee will not be allowed to displace, be awarded by bulletin or be honored to relieve a Welder position.
- Failure to complete the Frog and Rail & Switch Point Welding courses within 30 months of gaining a new Welder date or the Thermite Welding Review and Welding Review field courses every three years after completing the Frog and Rail & Switch Point courses will result in a WT3X restriction. In addition, the employee will not be allowed to displace, be awarded by bulletin or be honored to relieve a Welder position.

## FRA Qualification Process Tier I, II and III

**Tier I prequalification**, is a an open-book Web based test over the FRA Track Safety Standards and must be proctored by an employee's supervisor or exempt officer. The employee may self-enroll for the exam in their Learning Portal.

Upon successful completion of the exam, with a passing score of 90%, employees seeking FRA qualification may complete the process as outlined below.

### **The Tier II qualification course, exam and field audit process is as follows:**

Upon successful completion of the FRA Tier II course and exam at the Technical Training Center, BNSF employees will be granted a provisional FRA Tier II qualification. This qualification expires 90 days from the date the employee successfully completed the exam.

The employee will then be eligible to bid, and be awarded, positions requiring FRA qualification in an attempt to gain new seniority dates (foremen, assistant foremen, welders, etc).

#### ***Employees who fail exam:***

*Employees will have one (1) additional attempt to take and pass the exam at the end of the course. Employees who do not pass after their second attempt must wait 12 months (calculated from the date of their last attempt) before attempting the FRA Tier II qualification exam again.*

### **Tier II Qualification Audit:**

Once the employee receives a provisional qualification, he/she **must take the following steps:**

1. Bid, and be awarded, a position that requires FRA qualification.

**OR**

2. Sign up for a qualification audit - [http://udprd/enme/apps/frat\\_enrollment/request\\_eval.html](http://udprd/enme/apps/frat_enrollment/request_eval.html)
3. After completing Step1 or Step 2, the employee must arrange time with his/her supervisor to complete the Tier II field audit. The audit must be completed **no later than 30 days** of *physically* reporting to a position requiring the qualification, **AND** within the 90-day provisional timeframe.

Employees who successfully complete the field qualification audit in two (2) attempts or less, and within the 90-day time limit, will be Tier II qualified with an expiration date of December 31, three (3) years from the Tier II course completion date.

#### ***Employees who fail the qualification audit:***

*For any employee who fails the field audit twice, or does not successfully complete the field audit within 90 days of the course end date, FRA/FRB qualifications will be terminated and will be removed from a position if assigned based on provisional Tier II qualification.*

## **TINS – BNSF Tier III Qualification Track Inspectors**

Effective July 1, 2015, BNSF, all Track Inspector, Motor Track Inspector, and Track Supervisor Positions, will require TINS – BNSF Tier III Qualification.

### **Employees seeking the BNSF Tier III qualification:**

Following successful completion of the FRA Tier II qualification audit, an employee's supervisor must then enroll the employee in the BNSF Tier III course by coordinating with the Manager Engineering Certification on the employee's home district.

Employees are assigned to the next available BNSF Tier III Track Safety Standards course. The course is held on the employee's home district. The employee must take and pass the exam at the end of the course with a score  $\geq 85\%$ . Employees will have one (1) attempt to take and pass the exam at the end of the course. Employees who pass the exam will obtain a 90-day provisional TINS qualification. The provisional TINS qualification effective date will be set to the BNSF Tier III course end date and employees will be able to exercise seniority to positions requiring the TINS qualification.

**Note: Employees obtaining a position requiring the TINS qualification with their provisional qualification will have 30 days to request and pass the BNSF Tier III Qualification Audit.**

#### ***Employees who fails the exam:***

*Employees will have one (1) additional attempt to take and pass the exam at the end of the course. Employees who do not pass after their second attempt must wait 12 months (calculated from the date of their last attempt) before attempting the BNSF Tier III qualification again.*

### **BNSF Tier III Qualification Audit:**

Within 90 days of successful completion of the BNSF Tier III class, each employee must coordinate with the Manager Engineering Certification (at a time that is convenient for both the supervisor and the employee) to demonstrate competency in all areas of the Tier III course. Employees who fail to submit a request or pass the BNSF Tier III Qualification Audit within the 90-day period will lose their provisional TINS qualification.

**Employees obtaining a position requiring the TINS qualification using their provisional qualification will have 30 days from the date they report to request and pass the BNSF Tier III Qualification Audit. Employees who fail to request or pass the BNSF Tier III qualification audit within the 30-day period will lose the provisional TINS qualification and they will be removed from the position.**

To pass the BNSF Tier III qualification audit requires a score of  $\geq 90\%$  and 100% command of the 13 core competencies.

Upon successful completion of the BNSF Tier III exam and the qualification audit, the TINS qualification will be extended, and expire December 31<sup>st</sup> of the third year following the Tier III qualification audit.

**TINS – BNSF Tier III Qualification  
Track Inspectors  
(Continued)**

**If the employee fails the qualification audit:**

*Employees will have one (1) additional attempt to pass the qualification audit if they meet one of the following criteria:*

- ☐ *Employees who obtained and reported to a position requiring the TINS qualification and are still within their 30-day provisional period; or*
- ☐ *Employees whose 90-day provisional TINS qualification has not yet expired.*

*Employees who do not pass after their second attempt will have their TINS qualification terminated and these employees must wait 12 months (calculated from the date of their last attempt) before they attempt the TINS qualification process again.*

**NOTE:** Employees under this section who fail to pass the exam or the audit will be afforded one (1) additional attempt to pass the exam or the audit. Employees who do not pass after their second attempt will have their TINS qualification terminated, and these employees must wait 12 months (calculated from the date of their last attempt) before they attempt the BNSF Tier III qualification process again.

**Once qualified, the following must occur to maintain the qualification:**

Prior to an employee's TINS qualification expiring, he or she must take a two-day field requalification course and pass an exam at the end with a score  $\geq 85\%$ . Upon successful completion of the BNSF Tier III requalification exam, the TINS qualification will be extended and will expire on December 31<sup>st</sup> in the third year following the TINS requalification course.

**Note:** Successful completion of the Tier III requalification exam will serve to extend an employee's FRA2 qualification for another 3-year period, in addition to their TINS qualification. In other words, employees with TINS and FRA2 do not have to take two requalification exams.

**TINS – BNSF Tier III Qualification  
Track Inspectors  
(Continued)**

**If an employee allows their TINS qualification to expire:**

Employees who did not attend a field requalification course and allowed their TINS qualification to expire must attempt both the BNSF Tier III requalification exam and the BNSF Tier III qualification audit, in order to requalify. Supervisors must coordinate with the Manager Engineering Certification to enroll these employees in the BNSF Tier III requalification exam. Employees must take and pass the BNSF Tier III web-based exam with a score  $\geq 85\%$ .

To pass the BNSF Tier III qualification audit requires 100% command of the 13 core competencies and a passing score  $\geq 90\%$ . The **employee** must coordinate with the Manager Engineering Certification (at a time that is convenient for both the supervisor and the employee) to demonstrate competency in all areas of the Tier III course.

Upon successful completion of the BNSF Tier III qualification audit, the TINS qualification will be reassigned, and employees will then have the ability to exercise seniority to positions requiring the TINS qualification. An employee's TINS qualification will expire December 31<sup>st</sup> of the third year following the TINS qualification audit.

**NOTE: Employees under this section who fail to pass the exam or the audit will be afforded one (1) additional attempt to pass the exam or the audit. Employees who do not pass after their second attempt must wait 12 months (calculated from the date of their last attempt) before they attempt the BNSF Tier III qualification again.**

**BRIDGE INSPECTOR**

**QUALIFICATION**

**GUIDELINES**

Effective July 1, 2018

## **BI1 – Tier 1 Bridge Inspector Qualification**

The Tier 1 Bridge Inspector qualification (BI1) is a prequalification requirement. Employees desiring to exercise seniority to any Bridge Inspector position must have the BI1 qualification at the time they exercise seniority or make application for a position. Employees interested in obtaining the BI1 qualification must coordinate enrollment in the following courses with their immediate Supervisor, as needed:

1. Structures Inspection – Fundamentals (Employees must complete and pass this course with a score  $\geq 80\%$ .)
2. Bridge Inspector Climbing (Employees must attend and complete coursework.)

**Note:** The BI1 qualification does not expire.

---

### **If the employee fails the course(s):**

Employees failing Structures Inspection-Fundamentals or Bridge Inspector Climbing will have one (1) additional attempt to successfully complete the failed course(s) within 6 months of the first attempt (calculated from the date of their first attempt).

**NOTE:** Bridge Inspectors are required to have both FRA Tier I and II qualifications, in addition to the Bridge Inspector (BI) qualifications. Please refer to the FRA Qualification Guidelines for requirements. In addition, the FRA Qualification Guidelines will govern those employees failing either FRA Tier I or FRA Tier II course(s).

## BI2 – Tier 2 Bridge Inspector Qualification

The Tier 2 Bridge Inspector qualification (BI2) is a “must obtain” qualification (see “**If the employee fails the course(s)**” section below). Employees who do not have the BI2 qualification and exercise seniority to a Bridge Inspector position must first complete the Structures Inspection-Applied Practices and then the Bridge Inspector Advanced Techniques courses within 6 months of date first assigned to the Bridge Inspector position.\*

**Note:** Employees failing to obtain the BI2 qualification within the 6-month timeframe will be removed immediately from the Bridge Inspector position. Employees described under this Note desiring to pursue the Tier 2 qualification process will be required to wait 12 months (calculated from the sixth month) before restarting the BI2 qualification process.

Employees must coordinate enrollment in the following courses with their immediate Supervisor, as needed:

1. Structures Inspection – Applied Practices (Employees must attend an instructor-led class and pass this course with a score  $\geq 80\%$ . Note: Employees must successfully complete this course before attempting the Bridge Inspector Advanced Techniques course.)
2. Bridge Inspector Advanced Techniques (Employees must attend an instructor-led class and pass this course with a score  $\geq 80\%$ .)

\*Employees do not have to be assigned to a Bridge Inspector position in order to obtain the BI2 qualification. Those employees interested in pursuing the BI2 qualification will need to coordinate their enrollment in the required courses with their immediate Supervisor.

---

### **If the employee fails the course(s):**

Employees failing Structures Inspection-Applied Practices or Bridge Inspector Advanced Techniques will have one (1) additional attempt to successfully complete the failed course(s) within 6 months of date first assigned to a Bridge Inspector position. Employees who do not pass after the one (1) additional attempt will be removed immediately from the Bridge Inspector position. Those employees failing to successfully complete both courses will have to wait 12 months before re-enrolling in the BI2 training courses, and will be required to obtain the BI2 qualification **before** exercising seniority to any Bridge Inspector position.

## **BI3 – Tier 3 Bridge Inspector Qualification**

**Tier 3 Bridge Inspector qualification (BI3) is a “must obtain” qualification. Within 90 days of completing BI2 (30 days if assigned to a Bridge Inspector position) an employee must successfully complete the Bridge Inspection Tier 3 field competency audit (BI3). Employee must coordinate the scheduling of the Tier 3 field competency audit with their supervisor.**

### **If employee does not complete the field competency audit within required timeline:**

Failure to complete the program within the required timeline will result in the employee being removed from the Inspector position. If the employee wishes to continue to pursue the qualification process, they will need to wait a period of one year and restart the BI3 qualification process.

\*Employees do not have to be assigned to a Bridge Inspector position in order to obtain the BI3 qualification. Those employees interested in pursuing the BI3 qualification will need to coordinate scheduling of Tier 3 field competency audit with their immediate Supervisor.

---

### **If the employee fails the field competency audit:**

Employees failing Bridge Inspection Tier 3 Field Competency Audit will have one (1) additional attempt to successfully complete the Tier 3 Field Competency Audit, within 90 days (30 days if assigned to a Bridge Inspector position) of successfully completing the Bridge Inspector Advanced Techniques class. Employees who do not pass after the one (1) additional attempt will be removed immediately from the Bridge Inspector position, if assigned, and their Bridge Inspector Tier 2 qualification will be revoked. Employees failing the Tier 3 Field Competency Audit will have to wait 12 months (from revocation date of Tier 2 qualification) before re-enrolling in the Bridge Inspector Tier 2 (BI2) qualification program.

## **Requalification Process**

### **Once BI3 qualified, the following must occur to maintain the qualification:**

Every 3 years, the employee must successfully complete the Requalification Review Course with scores  $\geq 80\%$ .

Employees must maintain all other Bridge Inspector position qualification requirements.

**NOTICE OF ENFORCEMENT POLICY  
REGARDING EXPIRING DRIVER'S LICENSES  
AND MEDICAL EXAMINER'S CERTIFICATES  
DURING COVID-19 NATIONAL EMERGENCY**

**May 26, 2021**

On March 13, 2020, a national emergency was declared under 42 U.S.C. § 5191(b) and a public health emergency was declared on January 31, 2020 related to Coronavirus Disease 2019 (COVID-19). This Notice is in response to the continuing COVID-19 public health emergency and the effects on people and the immediate risk to public health, safety, welfare and economic recovery in the fifty States and the District of Columbia. Due to the COVID-19 public health emergency, many States are experiencing backlogs or reduced hours of operation in their State Driver Licensing Agencies (SDLAs) in response to the guidance from the U.S. Centers for Disease Control and Prevention to use social distancing to reduce the spread of COVID-19. The pace of return to normal operations has varied across the country. As a result, many commercial motor vehicle (CMV) drivers may be unable to renew their driver's license or provide a medical certificate to their SDLA.

In addition, due to limited operations or backlogs, drivers may be unable to obtain appointments for physical examinations with medical examiners to comply with the Federal Motor Carrier Safety Regulations (FMCSRs). Given the national emergency, there is a continued public need for immediate transportation of essential supplies, equipment, and persons, which requires an adequate and sustained supply of CMV drivers including Commercial Learner's Permit (CLP) holders, Commercial Driver's License (CDL) holders, and non-CDL commercial drivers. Ensuring that drivers are available to operate CMVs during the national emergency is critical to continued operation of the transportation and energy supply networks and the safety and economic stability of our Nation.

This Notice of Enforcement Policy, effective until August 31, 2021, extends a previous notice that was effective from March 24, 2020 through May 31, 2021. It provides needed relief from specified FMCSRs for CLP holders, CDL holders, and non-CDL drivers and motor carriers using those drivers. This Notice of Enforcement Policy applies to all CLP holders, CDL holders, and non-CDL drivers whose licenses were issued for less than the maximum period established by 49 CFR 383.25 and 383.73 and was valid on February 29, 2020 and expired on or after March 1, 2020.

FMCSA will exercise its enforcement discretion to not take enforcement action for the following:

1. 49 CFR 383.23(a)(2) – a CLP or CDL holder operating a CMV with an expired license, but only if the CLP or CDL was valid on February 29, 2020, and expired on or after March 1, 2020. Enforcement discretion regarding this provision also applies to non-domiciled CLP or CDL holders, provided the holder's legal presence is valid.

2. 49 CFR 383.37(a) – a motor carrier that allows a CLP or CDL driver, including non-domiciled CLP or CDL holders with valid legal presence, to operate a CMV during a period in which the driver does not have a current CLP or CDL, but only if the CLP or CDL was valid on February 29, 2020, and expired on or after March 1, 2020.
3. 49 CFR 391.11(b)(5) – a CMV driver (i.e., CLP, CDL, or non-CDL license holder) or motor carrier that allows a CMV driver to operate a CMV during a period in which the driver's operator license has expired, but only if the driver's license was valid on February 29, 2020, and expired on or after March 1, 2020, and the driver is otherwise qualified to drive under § 391.11.
4. 49 CFR 391.45(b) – a CMV driver or motor carrier that allows a CMV driver to operate a CMV during a period in which the driver does not have the current medical certificate and any required medical variance as required by 49 CFR 391.45(b), but only if the driver has evidence of a valid medical certification or medical variance that expired on or after March 1, 2021. Drivers whose medical certification or medical variance expired before March 1, 2021 are not covered by this Notice of Enforcement Policy.

In accordance with 49 CFR 383.23(a)(1) and 391.41(a)(1)(i), FMCSA also continues to recognize the validity of commercial driver's licenses issued by Canadian Provinces and Territories and Licencias Federales de Conductor issued by the United Mexican States, in accordance with 49 CFR part 383, when such jurisdictions issue a similar notice or declaration extending the validity date of the medical examination and certification and/or validity of the corresponding commercial driver's license due to interruption to government service resulting from COVID-19.

All CLP, CDL, and non-CDL drivers are required to comply with all other applicable obligations under the FMCSRs and other applicable laws.

This Notice creates no individual rights of action and establishes no precedent for future determinations. FMCSA intends to review the status of this Notice of Enforcement Policy as of July 1, 2021, and may take action to terminate the Notice sooner if conditions warrant.

This Notice is effective on June 1, 2021 and expires on August 31, 2021, upon the revocation of the Declaration of National Emergency under 42 U.S.C. § 5191(b) concerning the COVID-19 public health emergency, or upon early termination by FMCSA, whichever is sooner.
