Re: Finance Docket No. 35087

Dear Ms. Johnson-Ball,

I must express my complete opposition the proposed acquisition of the EJ&E rail by the CN Rail. I cross the tracks six times per day. I will be crossing the tracks more in the warmer months due to the activities of my five young children. The proposed 289% increase in rail traffic will destroy my life style. Thousands of residents live north of the railroad crossings. We will be cut-off from the athletic facilities, library, retail centers and churches we use. Our high school and an elementary school abut the tracks. Much of the traffic for the schools and the industrial park cross the tracks at a single lane each way choke point. This will be a wreck if the sale goes through. Our village has borrowed or spent a huge amount of money to lure new residents to move within half a mile of the tracks. The tanking housing market has hurt us badly. Allowing the CN rail to buy the EJ&E would hurt us severely.

Sincerely,

Keith Petropoulos
