Hi David!

My husband and I are looking to buy a home in Kankakee and we currently live in the city so we hadn't heard of the GLB rail until recently when we began house hunting outside the city. The address we are looking at is 2710 Waldron Rd. Kankakee and I was wondering if the proposed line would by any chance come near that property? I read that the line can change its proposal by 30 miles on either side and I wanted to make sure if we buy a home it won't be potentially where the path of the train could end up? :) Please let me know if you get a chance. Thank you!

Best,
Meredith MacDougall
