Message:

In reference to STB Finance Docket Number 35087 I oppose the the CN purchase of the EJ&E railroad that bisects the town of New Lenox. Increased rail traffic of the magnitude proposed will impose undue negative economic and quality of life impacts on the residents and citizens traveling through the area. Cutting the town in half and shutting down North-South travel for 3 mile trains at a frequency of 1.25 per hour will impose too much a safety risk and economic burden for the town to accomodate. Proper provisioning for a rail operation of this scale has not been planned to mitigate the tremendous economic and social costs of it so I urge the decision makers on this matter to not approve the sale.

Thank You
 Chris Stockman
