To whom it may concern.

I seriously object to letting this new transaction to happen. We already have enough congestion in the Lake Zurich and Barrington area, that we can not handle. Try getting around RT. 12 during rush hours, Saturdays and Sundays. This new proposal will only back up more traffic on Rt. 12 when people can't turn onto Ela Rd going south because of the train traffic. Also Rt. 22 before Main St. will be backed up, leading to the backup on New Bypass Rt. 12. Also affected is Old Rand Road in Lake Zurich were another railroad crossing is which will back up traffic. Old Rand Road and Bypass 22 has helped us to try to stay off of Rt. 12. We are bottleneck in. Also at the Old Rand Rd. crossing, several high school students need to cross this intersection to get home when walking. Also Old Rand Rd. is our way to get to our downtown area in Lake Zurich. We also have congestion on Rt. 22 going east due to the road construction occurring on that road. I am an outside sales rep and I am constantly trying to find a way to get to my destinations, due the traffic on Rt.12. Most times I can use the alternatives. With this new congestion, I may never get anywhere or if I do, not on time. I live in Concord Village in Lake Zurich, It is between Rt. 12 and Bypass 22. and between Ela Rd and June Terrace. Please take my opinion into consideration. Citizens need help, too, not only the railroad.
