No EJ&E Rail Acquisition

This message is being sent in opposition to the acquisition of the Canadian National Acquisition of EJ&E rail line that cuts through the center of many northwest communities in the Chicago land area. Not only would this cause extreme congestion delaying the flow of traffic in areas that already have been flagged traffic concerns, but the bigger issue is one of safety. There have been numerous deaths in the area as it is. This acquisition would exacerbate these safety and traffic concerns and split this community in half. For the safety of our children, please do not allow this purchase to go through.
