**Transcript:**

847-381-4566. I'm calling regarding my concerns with the CN Railroad. I was at the meeting last night and I saw pictures with the arc to show how the arc is going to pick up all the trains and couple concerns, why are you going to let 5 lines all dump into 1, the noise pollution that we're going to suffer, the traffic, so we're going to have air pollution from all of the cars sitting there, and also the safety. If there is a train that comes across 59 and 14, my police and fire can not get to me and I can't get to the hospital if I'm sick or if my house burns down. Please look at the safety of the people and Buffalo Grove and all those towns that are for it, because they're going to have less trains, but they're already used to the trains, they've made accomodations for the trains. We aren't used to the trains, we didn't buy in the city to have this, so please look out for the people and not big business. And if you're going to look for big business, make them pay the mitigation costs to put overpasses at 59 and 14. If you're going to cave into the big business, which I'm really starting to think this country that's all you care about is big business and you don't care about the people, you don't care what happens to us, but if you're gonna cave, make them mitigate the costs, but not put it on the taxpayers. Thank you
