Message: I am against CN overtaking EJ&E railroad. I feel the rail system we currently have is contributing to the weakening of our environmental status and affecting our daily lives in both a positive and negative way. Positive in that it is providing transportation of needed supplies. Negative in that the delays, the air pollution emissions, and the noise level people in the area deal with on a day to day basis. Our goal should be to continue to provide rail transportation but limit the negative impact it imparts. Adding more train schedules to our area will defeat this purpose.
Jan Adler
