Message: regarding STB Finance Docket No. 35087

I believe this is definitely counter to the best interests of Northwest IN, having both a negative environmental and economic impact on the region. We don't want more and longer freight trains wrecking havoc on our communities. I also believe this would negatively affect current transportation issues we are currently dealing with in the region, namely those affecting expansion of the Gary airport, and that of the South Shore train system. I respectfully submit this for your thoughtful consideration.

Thank You

Gary Miller
