To Whom It May Concern:

An increase in traffic along the E.J. & E. railway through the east side of Aurora will have many negative impacts if mediating construction at road intersections is not taken. My wife, Jana, commutes from our home the Edward Hospital in Naperville, IL. She usually take U.S. Rt. 34 east and increased delays ~~would~~ by crossing trains would increase her commute time. Rt. 34 is already heavily congested during rush hours and increased train crossings would create an unacceptable situation. Further, I often take Liberty Street east and west when commuting to the Rt. 59 train station. Delays by crossing trains would make it difficult to catch the intended commuter trains to my office downtown. Traffic has become very congested as this area has developed in the twenty years we have lived here. Please provide adequate funding to improve the rail/street crossings in east Aurora. Thank you.
