Email Address: * perfectchair@aol.com

Group/Affiliation:
Message:

us a resident of the area of Plainfield that is purposed for part of the CN railway acqusition (docket 35087), I have been in correspondence with my local political affiliates, as well as the transportation board expressing the concerns that the increase in rail traffic and it's affects on our village as a result. I fear for the traffic issues, devaluation of homes, and the delay of emergency vehicles to the parties in need. You CANNOT have such a tremendous increase in rail traffic, and expect it to not have any of these affects on a community.

You are taking the burden from the city of Chicago, which has MANY alternate routes for traffic, and transfer it to the suburbs which do not have alternates, especially in Plainfield where the rail intersects several of the streets at many points.

Unless over or underpasses are constructed, there certainly will be the above mentioned concerns, and transferring the expenses of these constructual changes to the residents is a burden that cannot be undertaken.

A rush to decision on such an enormous project, without the proper surveys will only be catastrophic to the Plainfield, Il. community.

Please try to recognize this situation from the views of the residents of this community and it's safety.

Thank you for your time.
