Environmental Impact Statement

Comment Form

Draft Environmental Impact Statement for the
Proposed Canadian National Railway Company
Acquisition of the Elgin, Joliet and Eastern Railway
Company

STB Finance Docket No. 35087

Date: 8-27-08

Comments must be submitted by September 30, 2008.

After attending the public meeting in Barrington today and after reviewing the relevant documents, it is clear that STB must act responsibly by denying the request of CN to acquire EJ&E.

The Board should consider the long-term consequences and the big picture aspect of their decision. Profits of corporations should never take priority over human ~~and~~ impacts which are considerable. Let us learn from the past. Short-sighted, money driven, callous decisions, business or otherwise, degrade the world and the people who inhabit it.

How much of the natural world must be destroyed before we wake up from our ego-driven dream? How many people will need to die before we value people over profits? What is the cost to us all, in real terms, both monetary and especially social for "improved operations," "consolidated railcar classifications" and "access to customers located on EJ&E." Have you read these three primary purposes of the Proposed Action? Have you read them slowly? Weigh these stated purposes against any other measure of quality cherished by every human that values the earth, the society and the future. When will this insanity end. Hundreds of responsible intelligent people from all walks of life have raised serious, myriad and unaddressed objections to this action. Please listen and deny.

YOUR INPUT IS IMPORTANT!
