Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

STB Finance Docket No. 35087

Date: 8-27-08

The railroad Company should pay to have all railroad crossings upgraded so each crossing will have either an overpass or underpass. Stopping the trains is not realistic, but holding the railroad responsible for our safety is necessary. The traffic stoppage due to trains would cause gridlock in Barrington. The kids in school would have additional time on bus routes coming and going home to school. In addition, emergency response would be delayed due to train traffic. The additional trains will, no doubt, provide much revenue for the railroad. The railroad MUST pay for the upgraded crossings in Barrington. Also, what plans are in place to protect our children from hazardous materials should a derailment occur. The proximity of our schools should be considered.
