Subject The purchase of the EJ&E

I live in New Lenox, IL and am against the Canadian National purchasing the EJ&E, for the very reason that I would have to pay the crossing upgrades. If they want the line, they should put up the money for the improvements. Another foreign company dictating the terms. If Canadian National feels they would be saving time and money for their customers, then we small towns should not have to pay for infrastructure. Let them pass their expenses on to their customers, which ultimately is us. But at least everyone foots the bill, not the individual towns it passes through.

You are just pushing the pollution problem our way, easing it in the city. If you can decrease the pollution with specific filtering devices that are now available for the engines, it would be more acceptable.
