Dear Phillis,

9/20/08

Let me make one thing perfectly clear - I do not need or want Canadian National Railway anywhere near Frankfort. I do not want the increase in train traffic, from six to twenty eight per day. I also do not want the 600% increase in hazardous materials. If a train derails and spills hazardous waste, I'm sorry will not be adequate. There are many houses close to the tracks. This route cannot be for Canadian National Railway.

Canadian National Railway earned over 8 billion in revenues last year. Had can they possibly expect local taxpayers to pay for their overpasses and underpasses?

I, as a local home owner and tax payer, pay several thousand per year in property taxes. I cannot afford to be paying the bill for a company that made more than two billion dollars in profits last year.

Tell Canadian National Railway that they need to pay for all their improvements, overpasses, and underpasses. They also need to pay for all their projected expenses for the next two, ten, twenty, and even fifty years. If they don't want to pay these expenses, then they can find somewhere else to go with their railway.

Sincerely,
Allis J. Jensen
