I encourage the STB to move forward with plans for this new route. Having lived at the southern end of Lake Michigan all my life, I have innumerable times been inconvenienced by the massive volume of traffic in, out, and through Chicago land. It would be a blessing to have some of that traffic diverted south of us. I am extremely tired of the NIMBY crowd (actually not a crowd at all) whining about not having a clear view of their cows and whatnot, if a new train route were constructed. Those ppeople complain of safety issues, but those safety issues are certainly exacerbated by the much larger number of people living in our area, compared to the much more sparsely populated area of the purposed new route.

I encourage you to enact your plans for the new route.

Thank you,

George Grenchik
