

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 3/21/08

We moved into Lake Zurich in 1989 and have not left. We have seen many changes that were both good and bad for our town and the towns around us. The additional rail traffic to our town will have a big impact on my life and my families life. With 4 kids who are involved in soccer and Boy Scouts we drive around Lake Zurich, Barrington and most of the other towns surrounding Lake Zurich. My concerns are not only about the delays that I will run into driving my kids to their events and to my work. I'm concerned about the response time of police & fire departments. My father was a fireman and would always tell me how important it was to get to the scene as quickly as possible. It is critical that we not allow this deal to go through.

Best Regards

Michael Kehrmann
