

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

This is my second comment. I have filed a letter previously and stayed abreast of your reports and information and yet I am stunned that this will be allowed to happen. I have 5 children and live near to the tracks. Our quality of life will be ended but more importantly you are risking not only the safety of my children but the lives of countless other children who live, play & attend school in this community. The impact is and will be catastrophic. No progress is worth lives and many will be risked or lost by this. Please find another way to accomplish your goals. I cannot believe that there is not other options available to you that do not endanger so many people.
