The residents of Paw Paw, Illinois have been following the projected routes of the GLBRR. It has been brought up in front of the Village Board and also with County officials.

The railroad runs very close to the village to the west in two areas, at Chicago Road and also just south of this at Moffet Road.

At Chicago Road three houses will be cut off because of the necessary overpass and would need a frontage road,

At Moffet it crosses at an acute angle which will effect the school buses to comply with RR Crossing state laws.

By pushing the railroad farther west by a half mile, it would save the adverse effects on at least 12 homes and run mostly through open fields. We hope you will reexamine these points as to the viability of the route around Paw Paw, Illinois.

Respectfully, David J Vlasaty
