Message:

As a follow up to my E-Mail on Tuesday, March 11, I had mentioned that a train had been parked in our back yard for 9 hours. The train is still there with the engine running, and it is Thurs. 3/13. We did call the village of Frankfort and they sent out a police officer to take a look at the train and fill out a report. When he checked on the train there was no one in the train and the train was locked up. The train company has been called also. The village has been great in helping us with this matter. It has now been almost 48 hours with the train in our back yard with the engine running the whole time. Other trains have passed it by in the last two days. Any help you can give us in this matter would be helpful.
