Docket No FD-35952

I am a landowner directly in the path of the proposed Great Lakes Basin Railroad project. I resent being blindsided (Good only in war and TV show Survivor) by the procedure and the system used to promote such projects. Having no advanced warning or time to participate in the plan leaves everyone directly involved in project feeling betrayed by our system. A big corporation (or soon to be) is it for the money projected to be made, seems to be more important than all the little people directly affected. The advantages to all of us hearing the brunt of this project are elusive at best.

Thank for your time reading this.
