Hi Paul, just two comments:

1. The noise and vibration level of 60 trains a day passing just behind the new Metea High School will highly disturbing. CN as well as the City of Aurora will have to deal with constant complaints. Even a sound barrier wall will not keep the noise down.
2. The other issue is safety. The City better have a good reserve for lawsuits, when an emergency vehicle cannot get proceed due to train traffic.

Thanks for taking time to register our complaints,

Jeff Meador
