* How is it possible that only one of two major roadways crossing at grade with the E&J railway, was considered in the DEIS to be severely impacted with respect to vehicle traffic? In addition to Old McHenry Road, Gilmer Road is a major commuter route. Both roads run generally Northwest to Southeast, and carry tens of thousands of people from suburban towns Northwest of Chicago toward the major east/west route leading to our Interstate Highway system - I94/I294. Both of Gilmer and Old McHenry will suffer greatly ^{and equally} in the Village of Hawthorn Woods. This will be a terrible situation.
