 Message:

We have only two intersecting streets-both east/west roads bisected by EJ&E tracks. Delays of first responders to emergencies could be devastating.

All of Wayne's homes are on private wells, hazardous spills can poison these wells, no other source of fresh water.

Central Wayne with only 2 street, all routes in/out of town must cross railroads at grade level. Includes Wayne Elementary

RR tracks on all three sides of a triangle make central Wayne an Island - no way out.

Property value will go down, my home is a big part of our retirement.

Many homes right next to track or near, noise and vibration is extremely hazardous now, what happens when more trains start coming, and where will the number of trains coming through each day stop?

This is a threat to our health, safety, property and environment.

THIS CAN NOT GO THROUGH - PLEASE FIND ANOTHER OPTION!
