

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 09/27/09

As a senior citizen w/ medical concerns
I fear that the congestion created by the increased
train traffic will hinder the speed with which
medics can access the regional emergency facilities.
Also very concerned about the ability of the
Fire Dept to reach in time a dwelling with
a fire problem.
The potential traffic jams over the existing
ones will further result in pollution &
further waste of energy.
