Thanks Brian for the contacts.

Kevin and Kyle,

I am the head of Energy and Minerals Program at the Utah Geological Survey and I have studied the Green River Formation in Utah for 15+ years. While I am interested in your geotechnical work, I am more interested in your drilling of the GRF near Willow Creek Canyon. In particular, I am interested in any bedrock (not alluvium) core material (or cuttings) that you might be recovering as part of this project.

Can you give me more information on your drilling and core recovery (e.g., locations, core depths, etc.)?

As stated above, I am very familiar with the GRF and am more than willing to help interpret cores, if you need any geology help.

Thanks and I look forward to hearing from you.

Mike

Hi Josh. Thanks for the contact information. HDR is pleased to share samples and data with the UGS as the geotechnical drilling continues forward.

Kevin Keller and Kyle Robe with HDR have been copied on this email. They will be in touch with Mike soon.

Thank you!

Hi Brian,

Could you please pass along Mike Vanden Berg's contact information (see email below) to the correct person at HDR so that they can connect regarding the geotechnical drilling? Mike is with the Utah Geological Survey.

Thanks,

Josh

Josh,

Could you send the contact for HDR, I would like to discuss the geotechnical drilling on Forest Service land? In particular the core drilling.

Thanks

Mike
