

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

The environmental and safety impact of this proposal would be a disaster for this town and several of the surrounding communities. There must be another way to reroute these trains to take into account the welfare and health of the people affected by this situation. Underpasses and overpasses in areas where the population is limited and the environmental impact is low would be the best solution. CN should have to fund this infrastructure.
