Ex Parte 775 - Growth In the Freight Rail Industry

Notice of Intent to Participate

To the Surface Transportation Board,

Pursuant to the Board's notice served July 15, 2024, Parallel Systems, Inc. of Los Angeles, CA, requests 15 minutes to present testimony at the live hearing on September 17.

Parallel Systems is a developer of autonomous rail vehicles, with prototype vehicles awaiting mainline testing in the United States and Australia.

Parallel's technology will enable railroads to provide tailored service to individual shipments, avoiding aggregation into trains and sorting in yards. Parallel's innovations have attracted worldwide interest, and Parallel is engaged in commercial discussions with multiple US-based and overseas railways.

Marty Schlenker, Head of Strategy, will present Parallel's testimony. A prior commitment on September 16 requires Parallel to request that our testimony be scheduled on September 17.

Thank you,

Matt Soule
