

080204 Beck

Hello, this is George Beck. I am submitting my comment that there should be regulations in place for any trains entering the EJ&E will be no longer than 4600 ft and before allowing them onto the main line, they will have a receiving track or siding in the area to which they are going to receive them. And to have no crossings blocked at any time and the train will continually move past the crossing. Thank you.
