

To whom it may concern,

17 September 08

My husband said I am wasting my time, that the politicians have already decided that the Canadian National will takeover the ES+E

He may be right but the first time someone dies because the ambulance can't get to him fast enough or if a child gets killed by a train, I will be able to say I tried

We are already being taxed beyond our means. It sounds like the costs may drive us out of our beautiful Frankfort.

Please don't allow this to happen.

Sincerely,

Jacqueline Wittle
