Transcript:

I'm requesting a Naperville/Plainfield meeting from the STB, so that we are able to make formal comments as it affects our neighborhoods in Naperville, Illinois and I'd also like to make a comment in regards to the quiet zones for the Naperville area. I am, I understand that the uh quiet zones at this point, the studies show that we are above acceptable noise levels, however CN has not committed to anything in regards to how they're going to handle the um, sound of the whistles. We're looking at over 120 whistles a day and night um and how it would also affect our schools, which is right in the backyard, Peterson Elementary, of one of the tracks that they're looking at adding another track to. Um, so I think CN needs to be accountable for the construction plans, which we have not seen, um and that this uh acquisition should not go through. Thank you very much.
