The Project Location Map in your handout is very poorly presented. Most of the print is unreadable even with a magnifying glass. Your large maps placed on the tables in the presentation hall were not much better. Even your presenters were hard-pressed to point out specific areas.

I feel that most of the attendees were disappointed with their ability to interpret the display at such an open-house venue.

Maybe it would have been better to have a more formal arrangement with the audience in chairs facing the presenters. Maps and charts could be projected on a large screen with your people explaining the proposal. Afterwards, questions and answers could be heard by everyone with the help of portable microphones.

I realize the enormity of this project is mind-boggling and it will take years of planning before it can be even begun. I also believe that the proposal is a good one and a partial solution to our transportation gridlock. Best wishes for its success.
