Gentleman,

Here is another group of photos where the proposed lines would run through my property. My family and I have Easter here and hide eggs for the kiddos. Texas Materials can do better and so can the STB.

Sir,

Wanted to send you more photos of my property and question why a foreign company who's endgame is to make millions off of track usage rights, destroy land, and use false pretenses to line their private pockets is even granted an audience with the STB board hearings? There is plenty of commercial land they could create their wye on and much better options for routes. This comes from a US Army Combat Veteran, Bronze Star recipient and most importantly a father.

As a former SSG in the US Army, a combat veteran, Bronze Star Recipient, multiple AAM and ARCOM awards I know the meaning of hurry up and wait.

I will email you both pictures and stories about my land weekly, if not daily until it is acknowledged that there will be no rail line built on my property.

Here is a picture of handprints my kiddo and I did when they poured the slab to my barn, these are memories that cannot be replaced or bought by a foreign company looking to make money off a rail line and take away property from American citizens.

Your rail proposal puts not one, but two tracks through my land and renders it uninhabitable, unsafe and damages the natural habitat for animals, plans for my retirement home and even some endangered species. The report submitted by Texas Materials does not even mention any of the commonly found birds and spiders endangered and located on my property

Sincerely,

Edmund M Andel
