

Environmental Impact Statement

Draft Environmental Impact Statement for the Proposed Canadian National Railway Company Acquisition of the Elgin, Joliet and Eastern Railway Company

Date: 8/27/08

DEIS is wholly inadequate in analysis of many factors. It must be completely redone to incorporate the following:

- True measure of traffic at crossings at Rte 59, Rte 14, ~~R~~ and Lake Cook Rd. ~~to~~ DEIS year 2015 projections are actually below current levels
- Pedestrian crossings of students walking to Barrington High School, especially Lake Cook Rd.
- Cost of mitigation totally unrealistic. Also, without guaranteed sources of funding, any mitigation will not occur. The acquisition MUST NOT be approved ~~not~~ until all needed mitigation, (including grade separations) is funded and COMPLETED FIRST

DENY THIS ACQUISITION

[illegible]

Joliet
