Please refer to STB Finance Docket No. 35087 in all correspondence addressed to the Surface Transportation Board. Comments must be submitted by February 1, 2008.

I have 3 areas of concern with the sale of the EJ+E to CN.
They are: Traffic congestion due to increased train traffic
More horns at crossings
More rail noise

I also see two demands that should be made for the sale to progress. They are
CN must convert all major crossings to over/under passes
CN must construct noise abatement where the rails are within a specified distance to housing.

These two demands would eliminate my concerns as there would be no at grade crossings. Thus, there would be no traffic problems and no horns when approaching crossings.

This will result in CN spending some additional funds for upgrades, however that is not my concern. I suspect there can still be money made even after making the upgrades.
