Re: Great Lakes Basin Railroad
Docket No. FD-35952

Dear Mr. Navecky:

I am writing in regards to the proposed Great Lakes Basin Railroad. The GLB railroad, as it is currently mapped, would run directly across the county I live in (Grundy County, IL). My home is less than ten miles to the east from the LaSalle County Exelon nuclear plant. There is currently a railroad that runs south of our property and the GLB Railroad is mapped to run directly north of our property. This concerns me because if my family would ever need to immediately evacuate the area due to a disaster at the nuclear plant, we could possibly end up being blocked in on all sides due to trains blocking the crossings. I feel that this is a very big liability and would appreciate the Surface Transportation Board looking into this issue to ensure that my family would not be trapped in the event of an emergency. Thank you for your time and consideration.

Sincerely,

Sara J. Wollgast
